

Matthiola

Flower

Out of flower

Description: at least 25% of the individual flowers have shrunk, are dried out, glassy or brown.

Reject: if more than 50% of the raceme shows this symptom.

Percentage in flower

Record: the percentage in flower is the ratio of the part of the raceme with open flowers and the part of the raceme with buds. The number of flowers and buds is irrelevant.

Foliage

Yellow and/or brown foliage

Description: the foliage dries out, turns yellow or is affected by Botrytis.

Reject: if more than 50% of the leaf area and/or 50% of the total number of leaves is affected by one of these symptoms.

Wilting foliage

Description: the foliage starts to wilt and hang down along the stem.

Reject: when more than 50% of the leaf area and/or 50% of the total number of leaves is affected by this symptom.

Botrytis

Description: the foliage is affected by Botrytis.

Reject: when more than 50% of the leaf area and/or 50% of the total number of leaves is affected.

Mildew

Description: the foliage is affected by mildew.

Reject: when more than 50% of the leaf area and/or 50% of the total number of leaves is affected.
